

VOLUNTEER WITH OUR MARKETPLACE MINISTRY

Help build and maintain blogs and websites that will advance our Marketplace Ministry. These projects encourage all Christians to use their vocation to advance the Kingdom.

Details

A basic knowledge of Wordpress would be helpful, or at least a willingness to learn the basics.

The time commitment for our existing site could be as little as 3 or 4 hours a month. You would assist in creating blog posts. If you can volunteer additional hours you could help increase the frequency of posts we make.

We're also designing a brand new site to serve as a resource and connection point for people seeking to integrate faith and work. This site needs to be designed from scratch and then expanded and developed as time allows. Initial development will be more time intensive, ideally several hours a week, but we could piece out small parts and research needs if your time is limited.

If you have any interest in serving through one of these projects, please fill out the form at TeamExpansion.org/Volunteer to get started.
